**Animal/Herd:** RAIDEN EVENSTAR

All client, owner and animal details supplied by the submitter.

 Tests Requested:  
 1 x Urine - Urine Protein Creatinine Ratio

#### Chemistry - Cumulative

	CH2304763 10/03/2023 RAIDEN EVENSTAR	Units	Ref Interval
U. Protein (g/l)	0.14	g/L	
Urine Creat	19559	μmol/L	
Urine Protein/Creat Ratio	0.06	RATIO	

Renal proteinuria is defined as persistently elevated UP/Cs greater than 0.5 in dogs, & > 0.4 in cats which pre- and postrenal proteinuria has been ruled out. They may be of glomerular or tubulointerstitial origin. UP/Cs greater than 1-2.0 are strongly suggestive of glomerular disease.

IRIS (International Renal Interest Society [www.iris-kidney.com](http://www.iris-kidney.com) <<http://www.iris-kidney.com>>) recommends that at least 3 urine samples are collected over a period of at least 2 weeks for sub-staging renal disease.

UP/C value	Substage
Dogs	Cats
< 0.2	< 0.2 Non-proteinuric
0.2 - 0.5	0.2-0.4 Borderline proteinuric
> 0.5	> 0.4 Proteinuric

Interim report has been sent out on this case.

Test methodology references are available on request.

(Note: Results apply only to samples received, on an as found basis. Reference intervals are standard Gribbles Veterinary reference intervals.)

**Signed** Sarah Parker  
 (Specimen Reception - Ch)

**Signed** Rebecca Allan  
 (Clinical Pathology)

**Report Date:** 10/03/2023 12:40

**Final**

Gribbles Veterinary Pathology make every effort to collect, analyse and report the results of tests accurately and promptly but accepts no responsibility for any factors which influence the results that are beyond our control. This report should not be reproduced except in full. All sample identification supplied by the submitter.
